

Tabbed Dividers for Classic Planner

Instructions: Print on two separate sheets of thick paper (card stock). Cut along the solid lines, arrange, and hole punch to fit your classic size planner (5.5" x 8.5").

(Note: the tabs will stick out 3/8" from the other pages in your planner, but the rest of the right edge will be slightly shorter than the other pages. This is normal. It has to be that way to be able to fit 2 tabs on one 8x11" page.)

Caution: I had to change my printer settings to "Borderless" to get these to fit right on the page. I advise running a test page with scratch paper before you try it on your nice cardstock!

Enjoy! Feel free to leave a comment with any questions or concerns.
